Allowable Subject Matter

1. Claims 1-4 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art does not show or suggest a vehicle wheel formed by welding a radially in-turned rim flange to an outer peripheral disc portion, wherein the radially in-turned rim flange includes serrations thereon, and a continuous weld engaging at least some of the serration to secure the rim and disc together. For example, Connell et al shows two surfaces welded together at a knurled section. Knurls are a materially different type of surface feature than serrations. Stone does not disclose, or even discuss the apparent surface features located at the weld area.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
